Titan LED 1080p 3D

2,000* Lumens | Contrast Ratio: 2,000:1 | Part No:114-461

TITAN 3-CHIP LED SERIES
DIGITAL PROJECTORS

THE VISIONARIES CHOICE

**Colour System:** 3-chip DLP®
**DMD Specification:** 1920 x 1080 pixels native.
Fast transit pixels for smooth greyscale and improved contrast.

**Display Type:** 3 x 0.95" DarkChip™ DMD™
**Aspect Ratio:** 16x9
**Fill Factor:** 87%

**Key Features**
- Digital Projection has developed a variant of its Titan projector that incorporates the latest LED illumination technology to provide amazing quality images.
- These LEDs remain stable and consistent over many years of use, providing a colour gamut that goes way beyond the requirements of HDTV or cinema.
- The stability of the colour and luminance is of particular value in multi-projector installations. The very high frame rate, low latency capabilities are perfectly suited to simulation.
- Coupled with Digital Projection’s advanced video processing technology, the new light sources provide the ideal reference quality display for home theatre, post production, visualisation and simulation installations.
- *Takes into account Helmholtz-Kohlrausch effect. LED illuminated projectors produce extraordinarily high colour purity and saturation, thus appearing brighter than a lamp-based display with similar measured lumen specifications.

**Standard Inputs (1-8): Front End Video Capabilities**

**Video & Graphics Processing**
- High bandwidth digital & analog receiver with 10 bit A-D.
- Automatic detection of interlaced video and implementation of 3:2 or 2:2 extraction as appropriate, with pixel based, motion adaptive interpolation and auto cadence correction.
- Displayed image frame locked to input with as low as 1 frame total latency.
- 24p and 1080p native display.
- Image enhancement for MPEG, Mosquito noise & color transients in composite sources.

**Geometry Correction**
- Cornerstone, Vertical & Horizontal Keystone, Pincushion & Barrel, and Image Rotation.
- Non-linear Warp adjustment by moving points on an interpolated grid.

**Edge Blending**
- Semi-automated multi projector tiling
- Correction for non-active pixels at the edge of the display.

**Super Image Clarity**
- Geometry correction and Edge Blending implemented in single stage process, retaining maximum image resolution.

**Picture in Picture**
- Two sources can be displayed either one within the other (PIP), or side by side, with original aspect ratios maintained.

ColorMax™
- Accurate matching of projectors in tiled or blended applications.
- User selection and storage of primary and secondary color targets.

**High Bandwidth Inputs (9-11): Bypassing Front End for Minimal Latency**
- Pixel mapped to the display.
- Dual Link DVI accepts frame rates up to 160Hz with latency as low as 1 frame.
- HDMI 1.4 for Side by Side, Frame Packing & Top Bottom formats.
- Dual Flash Processing can be used to multiply the displayed frame rate for 3D sources (example 144Hz display).
- FastFrame™ Smear Reduction.
- Dual Pipe processing: two sources in parallel for left and right eyes.
- Synchronisation of active glasses or polarising switcher.

**Projector Controller Software**
- Intuitive user interface for network control
- Simultaneous control of user-defined groups of projectors
- At-a-glance monitoring of projector status

**Source Compatibility:**
3GSDI is SMPTE 292M, SMPTE 259M-C and SMPTE 424M compliant. HDMI and DVI include Deep Color™ processing up to 36 bit.
DVI inputs are HDMI compatible.
Digital Audio Extraction via SPDIF for HDMI sources.
Graphics standards up to 1920 x 1200 at 60Hz via DVI or VGA.
Component Video (SD and HD) via YPrPb, RGB or RGBS.
S-Video (PAL, NTSC & SECAM)
Composite Video (PAL, NTSC & SECAM)

High Bandwidth, Pixel Mapped Path:
Dual DVI accepts graphics standards up to 1920 x 1200 at 120Hz.
HDMI 1.4 including 3D Standards
Dual Pipe (2 x DVI)

**3D Formats Supported**
- Frame Packing
- Dual Pipe
- Frame Sequential
- Side By Side (half)
- Top and Bottom

**Computer Compatibility**
- Up to 1920 x 1200

**Bandwidth**
- 170 MHz on analog RGB
- 165 Megapixels per second on HDMI and DVI
- 297 Megapixels per second on Dual Link DVI
Remote Control
Addressable IR remote control, wireless and wired with loop-through.
On-Board invertable keypad

Automation Control
RS232
LAN

Colour Temperature
User selectable from 3200 to 9000K

Lamp Type
Typical Lamp Life
LED Illumination Module
60,000 hours

* Lens focal ranges above are the optimised distances but are likely to focus further, please contact your RSM for more details. Lens ratio tolerances: E-Vision Series: +/-3%. HighLite Series: +/- 5%. M-Vision Series: +/- 2%. Titan Series: +/- 2%, INSIGHT Series: +/-2%.

Lens Mount
Motorised and programmable shift, zoom and focus. Intelligent Lens Memory with 5 user-definable preset positions.

Mechanical Mounting
Front/Rear Table: Yes
Front/Rear Ceiling: Yes
Adjustable Front/Rear Feet: Yes
Rugged, staging tolerant chassis with integrated handles. Optional RapidRig™ frame with integrated pitch, roll and yaw adjustments.

Power Requirements
100-240VAC 50/60Hz single phase
400W

Thermal Dissipation
1365 BTU/Hour
42 dBA

Operating/Storage Temperature
Operating: 0 to 35C (32 to 95F)
Storage: -10 to 50C (14 to 122F)
20 to 80% non-condensing

Weight (Chassis Only)
39 kg
86.0 lb
